PROFESSIONAL SUMMARY

Senior frontend engineer with 10+ years across UI/UX design and production SaaS development. I build data-heavy web applications, dashboards, multi-step workflows, design systems, and AI-powered product features. Recent work spans React/Mantine/Zustand feature areas, a large Vue 2/3 enterprise platform, and self-funded AI products with Next/Nuxt, TypeScript, Prisma/Postgres, LLM/image-generation APIs, billing, and deployment.

CORE STRENGTHS

- Dual-stack frontend: React/Next.js and Vue/Nuxt, both production-level.
- Complex SaaS UI: dashboards, wizards, forms, data grids, maps, and filters.
- Design-system execution: pixel-perfect UI, clean components, reusable patterns.
- AI product UX: prompt/response flows, async generation states, structured outputs, failure states.
- Testing discipline with Vitest, Playwright, and Cypress.
- Cross-functional collaboration with product, design, and backend teams.

PROFESSIONAL EXPERIENCE

Founder & AI Product Engineer / Frontend Engineer

Phosphene

May 2026 - Present | Remote

Self-funded AI SaaS product

- Built an AI image-generation workspace from scratch: visual graph editor, prompt orchestration, generation flows, billing, and deployment.
- Designed frontend architecture and UX for complex generation workflows with reusable Nuxt/Vue components and type-safe APIs.
- Integrated LLM/image-generation APIs, structured prompt handling, async job states, error handling, usage awareness, and Paddle billing.
- Stack: TypeScript, Nuxt 4, Vue 3, tRPC, Prisma/Postgres, Vue Flow, fal.ai, Gemini API, Paddle.

Senior Frontend Developer

Broker Online Exchange (acquired by AppDirect)

Aug 2021 - May 2026 | Remote

B2B SaaS for energy-brokerage workflows: CRM, pricing, contracts, commissions, renewals

- Shipped React/Mantine/Zustand feature areas while maintaining and modernizing a large Vue 2/3 enterprise SPA.
- Led a design-system re-theme to AppDirect's Mantine-based design language and converted legacy UI patterns into consistent components.
- Built production dashboards, dense grids, DevExtreme charts, interactive SVG maps, complex filters, and multi-step workflows.
- Engineered frontend for AI Bill-Scan-to-Contract/Quote using Gemini on Vertex AI: prompt design, structured response UI, failure states, logging, and cost monitoring.
- Increased test coverage on a core module from 0 to ~80% with Vitest and coordinated Cypress E2E work.

BEST FIT

- Senior Frontend Engineer
- Dual-stack React/Vue Engineer
- AI Product Engineer
- Frontend-heavy Fullstack
- Design Systems / SaaS UI

KEY SKILLS

- TypeScript
- React / Next.js
- Vue 2/3 / Nuxt
- Mantine / shadcn/ui
- TanStack Query / Zustand
- GraphQL / REST / tRPC
- Prisma / Postgres
- DevExtreme / D3.js / SVG
- Gemini API / Google Gen AI
- Vitest / Playwright / Cypress

AI STACK

- LLM prompt and response UX
- Structured outputs
- Tool-calling patterns
- Async generation states
- RAG patterns / vector search
- Logging and cost monitoring

HIGHLIGHTS

- 10+ years frontend + UI/UX
- Designer-turned-developer
- Product-minded remote engineer

Ilya Moskovkin

PROFESSIONAL EXPERIENCE *continued*

Frontend Developer

Ecor Rouge

Oct 2019 - Aug 2021 | Part-time / Remote

- Implemented responsive dashboard interfaces from design files into Laravel/Vue.js applications.
- Built and refined Vue components, layouts, and styles in close collaboration with backend developers.
- Helped translate product and design requirements into maintainable user interfaces.

UX/UI Designer / Frontend Developer

Couture Lane

Jul 2015 - Oct 2019 | SF Bay Area / Remote

- Designed and implemented customer-facing web interfaces.
- Expanded from UI/UX design into frontend development, building a strong design-to-code workflow.
- Built a foundation in interface design, usability, and high-fidelity frontend implementation.

SELECTED PROJECTS

Phosphene

phosphene.cc

- Graph-based visual prompt workspace for AI image generation; solo design and build.
- Nuxt 4, Vue 3, tRPC, Prisma/Postgres, Vue Flow, fal.ai, Gemini API, Paddle billing.

Broker Online Exchange

brokeronlinexchange.com

- B2B energy-brokerage platform featuring design-system re-theme, production dashboards, and AI Bill-Scan-to-Quote functionality.

Roomboard

roomboard.online

- Realtime visual collaboration room for moodboards and reviews.
- Next.js, Pixi.js canvas, Elixir/Phoenix, Supabase realtime.

Anchor

anchorapp.cc

- Calm daily-ritual app for mood, sleep, intention, and journaling.
- One Next.js codebase shipping to web, iOS/Android via Capacitor, and desktop via Electron.

WORKING STYLE

- Product-minded: focused on the full user flow, not only isolated components.
- Comfortable shipping improvements inside legacy systems while reducing complexity over time.
- Strong remote habits: clear demos, thoughtful PR notes, visible progress, small shippable slices.

<> TECHNICAL STACK —

Frontend

- TypeScript
- React / Next.js
- Vue 2/3 / Nuxt
- HTML5 / CSS3

State & Data

- TanStack Query
- Zustand
- Pinia / Vuex
- GraphQL / REST / tRPC

UI & Visualization

- Mantine UI
- shadcn/ui
- Tailwind
- Material UI
- DevExtreme grids/charts
- D3.js / SVG / canvas

AI Product

- Gemini API
- Google Gen AI SDK
- Prompt design
- Structured outputs
- Tool-calling patterns
- RAG concepts
- Async generation UX
- Cost monitoring

Backend-adjacent

- Prisma / Postgres
- Supabase
- API integrations
- Billing flows
- Deployment basics

TOOLS

- Git / GitHub
- Jira
- Cursor / Codex / Claude Code
- Remote async collaboration
